Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/781,613	Applicant(s) HORN ET AL.	
	Examiner Jack W. Lavinder	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

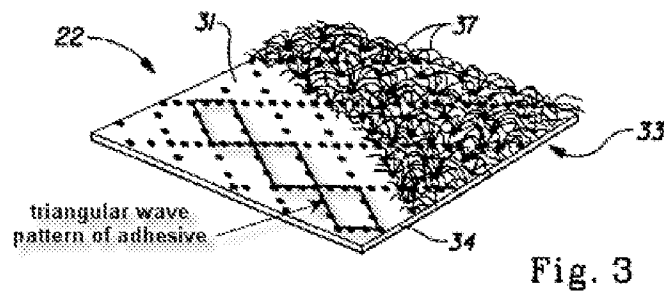

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 have been rejected under 35 U.S.C. 102(b) as being anticipated by King, 5595567. King discloses a non-woven loop member (37) bonded to a backing member (34) via a criss-cross tessellated pattern of adhesive (figures 2 and 3) lines: continuous or non-continuous, straight or curved (column 8, lines 17-25). King also discloses the specific density of pattern elements being at least 3.2 pattern elements per square centimeter, i.e., at least 9 patterns per square centimeter, wherein each side of the pattern element is .3 centimeters long (column 8, lines 61-end and column 9, lines 1-2).

Regarding claims 2-6, figure 2 of King discloses a tessellating pattern of adhesive forming a triangular wave pattern that is 180 degrees out of phase with the adjacent wave form.

Response to Arguments

3. Applicant's arguments filed 3/18/2008 have been fully considered but they are not persuasive. The addition of the limitation "non-circular" fails to overcome the prior art rejection based on King, 5595567. King discloses bond pattern lines made from the shape of an ellipse or an oval, which is non-circular (column 8, paragraph 2). The interpretation of the lines being formed from an oval or an ellipse is in regard to the above annotated figure 3. The interpretation is that the triangular wave adhesive pattern can be some form of a non-circular wave pattern, wherein the curved portions are in the form of a part of an oval or an ellipse.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
